Kickoff Workshop Complete

On Tuesday, July 30th, Project COMPLETE held a Kickoff workshop for all of the High Schools participating in this illustrious NSF grant. The July workshop was held to further advance engineering technology career pathways for high school students in North Louisiana. The counselors and teachers who attended enhanced their professional development skills in STEM education research, federal grants, and college partnerships. We would like to thank West Ouachita High, Quitman High School, D'Arboone Woods Charter School, and BPSTIL for their attendance and participation at the kickoff workshop. Their presence helped us expand our understanding of what is needed to make this grant successful.

Meet OUR PI

We are proud to announce that Gerry Caskey, Louisiana Delta Community College Ruston Campus Electrical-Industrial Technology Instructor, is our new PI for Project COMPLETE. Mr. Caskey attended the kickoff workshop and gave a motivational speech that made us all excited to implement this grant in our North Louisiana High Schools.

Watch Dr. Michael Swanbom, our LA Tech PI, answer your questions about Project COMPLETE.
