

FAA ArcMap UAS Facility Maps

FAA ArcMap UAS Facility Maps

https://www.faa.gov/uas/request_waiver/uas_facility_maps/ (Links to an external site.)Links to an external site.

UAS Facility Maps show the maximum altitudes around airports where the FAA **may** authorize part 107 UAS operations without additional safety analysis. [The maps \(Links to an external site.\)Links to an external site.](#) should be used to inform requests for part 107 airspace authorizations and waivers in controlled airspace.

NOTE: These maps DO NOT authorize operations in these areas at the depicted altitudes – they are for informational purposes ONLY. Operators must still apply to operate in controlled airspace (Class B, C, D, or surface area E) by completing a Part 107 Airspace Authorization or Waiver Application in the *FAA DroneZone*.

Individuals who request a part 107 airspace waiver and authorization are encouraged to consult the maps prior to submitting a request to determine locations and altitudes that can be approved quickly.

The maps will be published in phases, starting with Class E airport maps (published April 27, 2017).

For more information about UAS Facility Maps, please see these [Frequently Asked Questions \(Links to an external site.\)Links to an external site.](#)
