

Flight Simulator Videos

Go through these videos, tell me what you think. Please look over videos.

I think I am going with the Little Arms Studio...Zephyr, Seems the most robust, plus it seems to be set and built for academic use. Multiple Scenarios, grading options, difficulties, student transcript, course set up, flight hours, student logs and accounts. Really like it. Of course the student would have a \$60-70 fee, But the account would last well after the course ends. Plus the student would have to purchase their own terminal pilot controller. DMC would purchase the ones for the lab. Start with 10-12 then add as needed.

Also, for no charge and using the DJI terminal pilot controller the students can also use the free DJI simulator. But must have DJI account, UAV and controller.

So what are your thoughts, I want to take off on the decision asap. So we can get the necessary equipment asap. I have already installed the Zephyr Software to VB 251 and VB 224. You can do the same if you have been issued the account invitation.

For those that are in the process of getting their FAA 107 RP-UAS exam, do so by Spring Break, those enrolled in SP 2018 GUAS 2371 pass and move on to FAA online exam and FAA Site exam ASAP afterwards.
