EXECUTIVE SUMMARY

Information and Communication Technologies (ICT) is an umbrella term, widely used outside the U.S. and in the U.N., to encompass all rapidly emerging, evolving and converging Computer, Software, Networking, Telecommunications, Internet, Programming, Information Systems and Digital Media Technologies. A consolidated ICT term is useful, not only because you can Google it and get mostly relevant results, as opposed to Googling “IT” and getting every web page published in the English language, but because it allows for coordination and greater recognition of the scope and importance of the many inter-related and inter-dependent technologies, industries and occupations it encompasses.

ICT industries are an uncontroversial bright-spot in the California economy. Some 46,000 California companies produce ICT related goods and services (ranked 12th of California industries by firm count), generating more than \$170 billion in annual revenue (ranked 6th of California industries by revenues), employ about a million workers (ranked 12th of California industries by employee counts) and pay about \$76 billion in wages (ranked 2nd of California industries by wages paid). Many are thriving, even in a down economy.¹

ICT employment exists in every industry, because ICT is applied by most organizations in every industry to improve organizational efficiencies, productivity and strategic advantages. ICT Workforce already employs almost 1.2 million Californians, who get twice median wages and pay taxes, and ICT Workforce growth is strong. In fact, employers are reporting difficulty finding appropriately skilled ICT Workforce, even in this period of high unemployment.²

The California Community College (CCC) system, the largest higher educational system in the United States with 3 million students, is making great strides in developing California’s ICT Workforce. CCCs are the most cost-effective way of delivering needed ICT education to the California population.

For the 2010/11 academic year, the Mid-Pacific ICT Center (MPICT) and the California Community College (CCC) ICT Collaborative conducted an analysis of ICT related programs and academic credentials across the CCC system. This report is an analysis of that data and some related findings.

California community colleges offer more than 600 associate degrees and 1,500 academic certificates in 295 departments at 112 community colleges. Students enroll in more than half a million ICT related classes at CCCs every year.

However, there is also extraordinary inconsistency in how ICT is treated by different colleges, which determine curriculum and credentials locally.

- The 112 CCCs offer ICT education services through 295 different departments; those departments have 175 different names; 149 of those names are only used once in the CCC system; the organizational structure logic is different at different colleges; college websites are structured differently; program messaging is inconsistent; and that can be very confusing to those who are not already deeply embedded in the local college.

¹ 2010 Environmental Scan: Information and Communication Technologies in California Phase Two: Industry & Employment Outlook, MPICT and CCC Economic and Workforce Development Centers of Excellence, Available for download free at: http://www.mpict.org/ict_study_phase2.html.

² Ibid

- Those 295 different departments offer more than 600 associate level degrees; those degrees have more than 400 unique titles; 374 of the titles are used only once in the CCC system; even when the degree titles are the same, the content and rigor of requirements for the degree are usually different; and these inconsistencies are confusing to employers, students, counselors and other stakeholders. It devalues every CCC ICT related degree to have so many different, inconsistent and inadequately understood degrees.
- Those 295 different departments offer 1,500 academic certificates; those certificates have more than 1,100 unique titles; more than 1,000 of those titles are used only once across the CCC system; even when the titles are the same, the content and rigor of certificate requirements are usually different; and these inconsistencies are also confusing to most people. It devalues every CCC ICT related certificate to have so many different, inconsistent and poorly understood certificates.

This inconsistency leads to a lack of coherent articulation and transfer opportunities in ICT. It is too complex and difficult to articulate between programs and credentials when most programs and credentials are unique. The number of articulation negotiations and agreements required to fully articulate a system with 295 different departments is more than 43,000. This does not include articulation with ICT related programs at 4-year colleges and universities, which are also generally unique.

The current system of informing ICT related programs and credentials through local business and industry advisory groups is well intentioned. There are unique local conditions which affect local workforce demand, and it is important to engage with local employers in developing local workforce. However, it is also true that computers, the Internet and most ICT technologies work the same, independent of location. It is also important to deliver consistency across the CCC system, with credentials that have meaning with employers throughout California and articulated ICT educational pathways that allow students to transfer efficiently between CCCs and to 4 year colleges and universities.

California Community Colleges are the most cost-effective way of delivering quality higher education ICT knowledge and skills to its population. CCCs have extraordinary infrastructure, relationships and traditions in place. CCCs have already benefitted millions of Californians, and California and the California economy have received more than compensating returns on its CCC educational investments.

If CCCs can figure out how to coordinate and optimize ICT educational services in the largest higher educational system in the U.S., the implications are easily national in scope. It would be well worth the effort!

MPICT and the CCC ICT Collaborative recommend developing a comprehensive and detailed set of statewide, employer-generated, future-looking ICT Workforce competency demands – in a statistically significant way through a statewide employer survey. Local advisory models are generating too much inconsistency. Start at a foundational level - expectations for all ICT Workforce, regardless of specialized roles. Use those competencies to develop statewide common core Student Learning Outcomes (SLOs), and work to align community college ICT related programs to deliver those SLOs. Then, develop competency expectations in a similar manner for common ICT Workforce specialized roles. Finally, work to align and harmonize nomenclature and program and credential names to more consistently represent program offerings statewide.

This will help address the current “Skills Mismatch Problem,” increase the value of programs and credentials, and enable more effective transfer and articulation.

INTRODUCTION, OBJECTIVES, SCOPE, AND METHODOLOGY

The Mid-Pacific ICT Center (mpict.org) is funded by the National Science Foundation (NSF) Advanced Technological Education (ATE) program. Its mission is “to coordinate, promote and improve the quality of ICT education, with an emphasis on 2-year colleges, in a region consisting of California, Nevada, Hawaii and the Pacific Territories.”

The California Community College (CCC) ICT Collaborative (cccict.org) is a Perkins Title IB (state leadership) funded collaborative, awarded by the CCC Chancellor’s office Career Education Practices Unit³. Its mission is “to advance ICT education programs at California community colleges and enable a diverse student population to succeed in meeting industry and business ICT workforce needs.”

This study was jointly conducted and funded by MPICT and the CCC ICT Collaborative, adding to past research⁴ documenting the size and importance of ICT industry and employment in California, which is the demand side of the ICT Workforce marketplace. This report provides insight into the supply side of the ICT Workforce marketplace addressed by CCCs.

The objective of this report is to study ICT educational programs and academic credentials in ICT related programs across the California Community College (CCC) system:

- The largest higher educational system in the U.S., with 3 million students attending 112 colleges annually.
- One in four community college students in the U.S. attends a CCC.
- CCCs have the highest attendance rate of any U.S. community college system.
- CCCs enroll one in three Californians aged 18 – 24.
- Over 80% of CCC students work already.
- CCCs transfer 60% of California State University system graduates.
- CCCs transfer 30% of University of California system graduates.
- Every \$1 invested in CCC education returns \$3 to the California economy.
- CCCs provide important workforce preparation services, in addition to preparing students for transfer.⁵

To do so, this effort enlisted CCC faculty and MPICT staff to search all CCC websites and research ICT related programs. ICT related programs were summarized and described at each college in simple webpage portals on the MPICT/CCC ICT Collaborative website⁶ and information was gathered on all CCC ICT related programs and their academic credentials.

The body of the report summarizes research findings. Appendices provide supporting detail.

COLLEGES

There are currently 112 California Community Colleges.

Students at all of them need to develop an understanding of information and communication technologies (ICT) and how to be proficient Users of them (Digital Literacy).

They need opportunities to learn about ICT career and academic pathways.

They need opportunities to start their higher educational studies and transfer for additional study at 4-year colleges and universities.

They also need opportunities to develop more advanced technical knowledge and skills to prepare for or progress in ICT Workforce roles.

Different colleges respond to these needs in different ways. ICT related offerings at CCCs can be found in a wide variety of academic departments and programs, and where those offerings reside is often different at different colleges.

It can be frustrating for a student who is vaguely interested in “computer stuff” to learn about career and educational opportunities in ICT. That was the experience of our faculty researchers. In some colleges, ICT related offerings are spread across multiple departments (5 or more). Websites at different colleges are organized differently, with very different user experiences; ICT related nomenclature is different at different colleges; ICT related department names are different at different colleges; ICT related course and credential opportunities are distributed differently across different departments at different colleges; ICT related courses and credentials have different names; and advising and counseling services at different colleges address ICT education in different ways.

See [Appendix 1](#) for a list of all California Community Colleges. Each college name is a link to a one-page description of that college and its ICT related offerings on the MPICT/CCC ICT Collaborative website. These pages can help students, faculty, counselors and others more efficiently navigate ICT related offerings at individual colleges – and contact people at each college program for additional information.

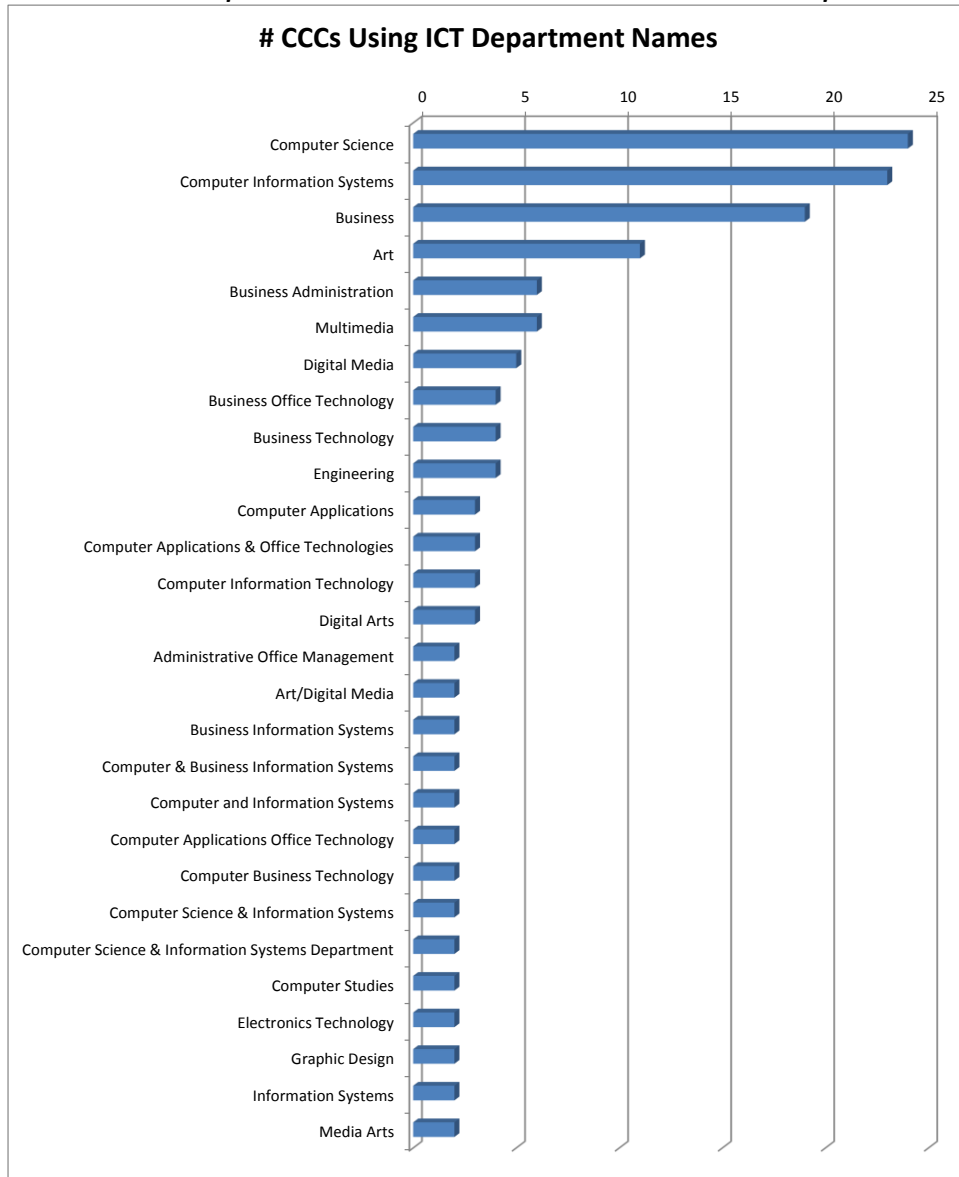

DEPARTMENTS

Please see [Appendix 2](#) for a list of ICT related department names as of 2010/11:

- The 112 California Community Colleges have 295 different departments offering ICT related curriculum.
- Those 295 departments have 177 different, unique names.
- The logic for which departments offer ICT related degrees and certificates is inconsistent.
- 149 of those department names are used only once by CCCs in California.
- 28 department names are used more than once across the CCC system.

Department names used more than once across the CCC system are provided in the following chart, with their frequency of use. All other 149 department names are used only once across the CCC system.

Chart 1: CCC ICT Related Department Names Used More Than Once and Their Frequencies – 2010/2011

DEGREES

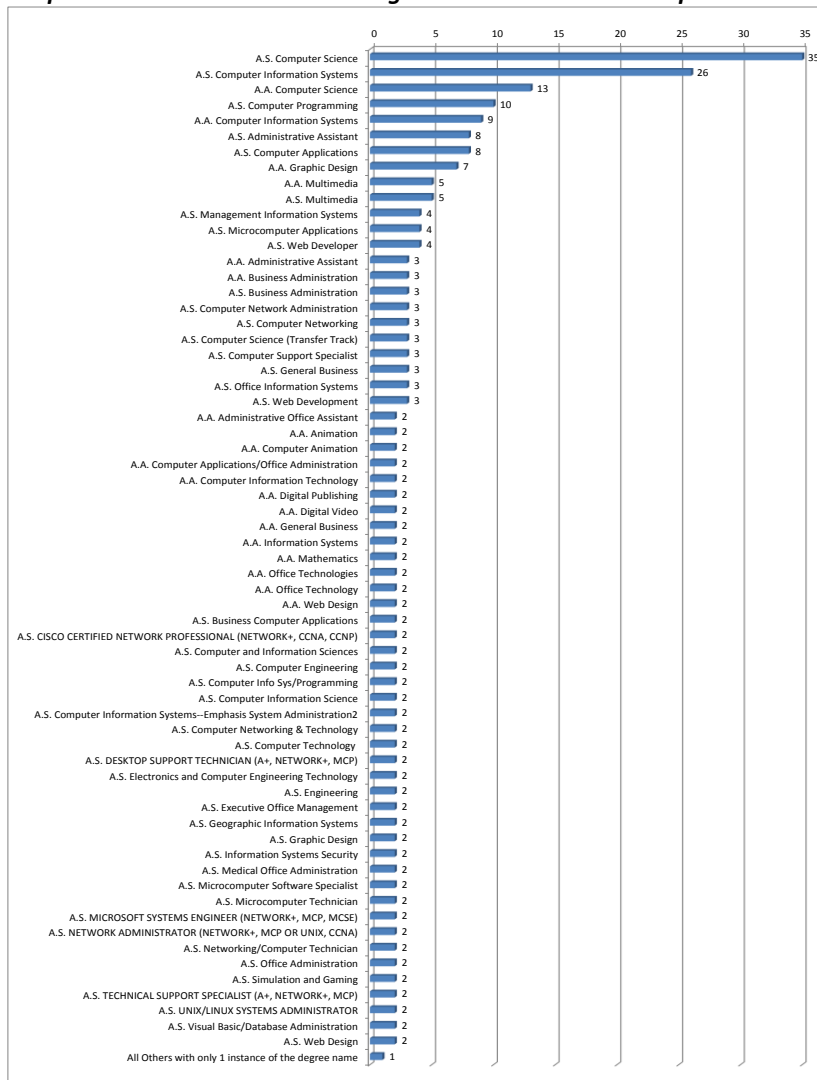

California Community Colleges offer Associate of Arts (A.A.) and Associate of Science (A.S.) “two-year” degrees.

[Appendix 3](#) is a list of ICT related associate level degrees offered by CCCs:

- The 295 departments at 112 CCC colleges offer 624 Associate level degrees related to ICT.
- Those 624 ICT related degrees have 438 different, unique degree titles.
- 374 of those titles are used only once; 41 are used only twice; and 10 are used only 3 times in the CCC system.
- Even where degree titles are the same, academic content and rigor are frequently different.
- The number of academic units required for the degree ranges from 6 to 60, in part because of inconsistencies about counting General Education unit requirements.
- Because of those inconsistencies, it is difficult and probably misleading to calculate average numbers of academic credits required for ICT related degrees across the CCC system.

The following graphic shows CCC ICT related associate degree names and their frequencies.

Chart 2: Top CCC ICT Related Associate Degree Names and Their Frequencies – 2010/2011

ACADEMIC CERTIFICATES

California community colleges offer a variety of academic certificates, including Certificates of Completion and Certificates of Achievement. Certificates have a wide range of course credit requirements, classified by the CCC System Office as:

- E - Certificate requiring 6 to fewer than 18 semester units (Not approved by System Office)
- B - Certificate requiring 12 to fewer than 18 semester units (Approved by System Office)
- L - Certificate requiring 18 to fewer than 30 semester units
- T - Certificate requiring 30 to fewer than 60 semester units
- F - Certificate requiring 60 or more semester units
- O - Other Credit Award, under 6 semester units
- NC - Non-Credit certificate

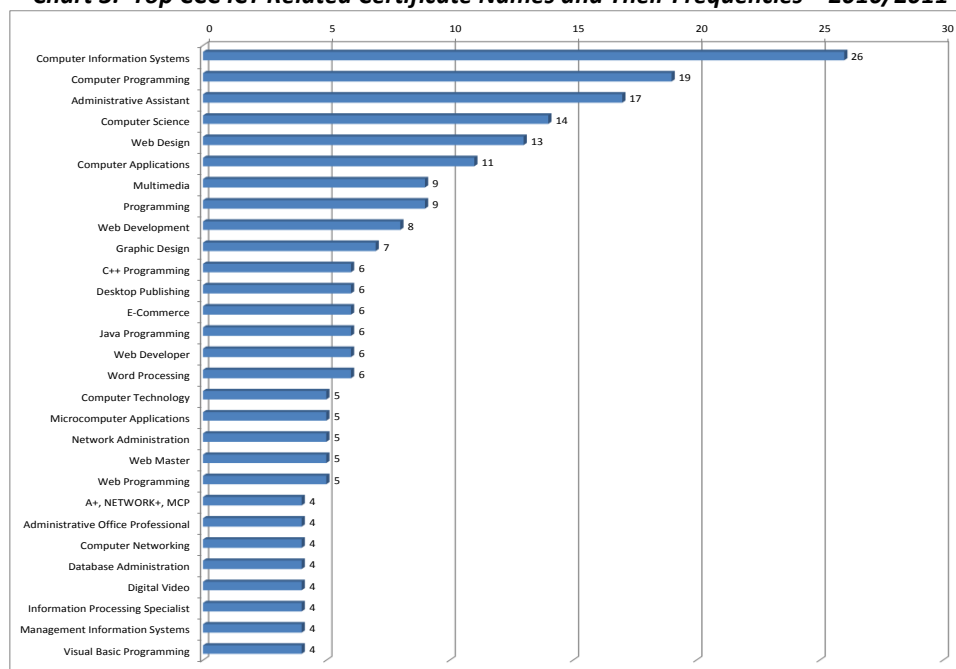

[Appendix 4](#) provides a list of CCC ICT related academic certificates.

The 295 departments at 112 colleges offer 1,500 unique academic certificates related to ICT:

- Those 1,500 ICT related academic certificates have 1,183 different, unique certificate titles.
- 1,049 of those titles are used only once; 180 are used only twice; and 45 are used 3 times in the CCC System.
- Even where names are the same, content and rigor are often different.
- The number of academic units required ranged from 2.5 to 66, with a mean of 22 and a median of 18.
- It is often difficult from website exploration to determine whether Academic Certificates are Certificates of Completion or Certificates of Achievement, or what those designations mean, practically.

Following is a graphic depicting ICT related certificate names used 4 or more times in the CCC system with frequency of use.

Chart 3: Top CCC ICT Related Certificate Names and Their Frequencies – 2010/2011

[Appendix 6](#) provides a list of all colleges, departments, degrees and certificates with links for more information.

OBSERVATIONS AND RECOMMENDATIONS

California Community Colleges operate in a decentralized way, with regard to academic program development and content. Local colleges have authority to create and administer programs as they see best. Career Technical Education (CTE) programs are supposed to be informed by business and industry advisory groups, so program and academic credential content meet local employer needs. Often, that works well – where there are specific large, local employer needs that can be identified, or where academic program content has been largely determined through industry or government licensing requirements or standards. However, while there are legitimate local and regional demands that are unique and worth understanding and adapting to through local business and industry engagement, it is also true that a computer, the Internet and most ICT technologies work the same, independent of location. There is at least some basis for consistency.

For ICT, educational credential development has been chaotic and inconsistent across the CCC system. While most programs and credentials have a sound logic and basis, have been justified locally and are the product of people who are legitimately working to deliver quality for the benefit of their students, inconsistencies across colleges and programs, which happen even with industry and business advisories, create confusion for students, employers and other stakeholders. For example, when an employer receives a resume with a CCC ICT related academic credential listed, too often he or she does not understand what that represents. What does that applicant know and what can he or she do?

It devalues all ICT related academic credentials at all California Community Colleges to have such inconsistencies across the system. Students, counselors and employers too often do not understand them. It should be in every ICT educator's self-interest to understand this and participate in efforts to harmonize and align ICT related curriculum and credentials.

It is also inefficient as a system to have so many independently developed and inconsistent programs and credentials. There is tremendous duplication of effort in creating programs and credentials independently, from scratch. The CCC system could realize efficiencies of scale with more centralized or coordinated program, course and credential development and management.

Further, as a result of these inconsistencies, it is extremely difficult to create efficient articulation and transfer options for students in ICT related subjects, both between different CCCs and between any CCC and any 4-year college or university. Every two points in an articulation discussion are unique, and it is a lot of work to figure out what is involved in each program, what to accept credit for and how. The number of department level articulation negotiations and agreements required to fully articulate a system with 295 different departments is more than 43,000. This does not include articulation with ICT related programs at 4-year colleges and universities, which are also generally unique. Many students suffer from a lack of coherent articulation and transfer opportunities in ICT. Students would be better served in California if there was better alignment. To achieve alignment, there has to be something to align to. There are currently no agreed upon standards or frameworks that CCCs use to align ICT related programs.

Finally, if CCC programs are going to be primarily evaluated by statewide success metrics defined as: 1) academic transfer, 2) academic degree completion, or 3) academic certificate completion, which has been advocated by the CCC Student Success Task Force⁷, CCC ICT related programs need to establish genuine value for those credentials in order to be evaluated well in the future. It is not clear to what extent employers or students value CCC ICT related credentials.

CCCs should figure out how to optimize and coordinate ICT educational services in the largest higher educational system in the U.S. The implications are easily national in scope. It would be well worth the effort!

⁷ <http://californiacommunitycolleges.cccco.edu/PolicyinAction/StudentSuccessTaskForce.aspx>

MPICT and the CCC ICT Collaborative recommend developing a comprehensive and detailed set of statewide, employer-generated, future-looking ICT Workforce competency demands – in a statistically significant way through a statewide employer survey. Local advisory models are generating too much inconsistency. Start at a foundational level - expectations for all ICT Workforce, regardless of specialized roles. Use those competencies to develop statewide common core Student Learning Outcomes (SLOs), and work to align community college ICT related programs to deliver those SLOs. Then, develop competency expectations in a similar manner for common ICT Workforce specialized roles. Finally, work to align and harmonize nomenclature and program and credential names to more consistently represent program offerings statewide.

This will help address the current “Skills Mismatch Problem,” increase the value of programs and credentials, and enable more effective transfer and articulation.

ACKNOWLEDGEMENTS

MPICT and the CCC ICT Collaborate would like to acknowledge and publicly express appreciation to the following people for their help in conducting this research:

- Andrew Vu, MPICT Intern
- Bill Doherty, Instructor, Truckee Meadows Community College
- Karen Stanton, Southern California Regional Coordinator, CCC ICT Collaborative
- Michael McKeever, Instructor, Santa Rosa Junior College
- Mike Murphy, Instructor, Foothill College
- Pierre Thiry, MPICT PI
- Richard Grotegut, Instructor, Ohlone College
- Rick Graziani, Instructor, Cabrillo College
- Sandy Jones, Instructor, Los Medanos College
- Tim Ryan, Network Manager, City College of San Francisco

DISCLAIMER

While sincere efforts have been made to assure the quality and accuracy of the information used in these analyses, it is difficult to extract data from college websites, and programs and credentials change. Program and academic credential titles are sometimes represented differently in different publications and for different purposes. There may be inaccuracies, anomalies and discrepancies. For example, some academic credential or program titles that are actually the same may be counted as different in some of these lists.

We discourage relying on the exact numbers collected in this analysis and instead encourage readers to look for large patterns in the data, which outliers, anomalies and discrepancies would not invalidate. The major patterns, findings and conclusions are clear, even if the numbers may not be exactly correct.

Residential Architecture Skills Certificate	1	1
Rich Media Productions	1	1
Routing & Switching (Cisco)	1	1
Routing Technology	1	1
Scientific Programming	1	1
Secretarial	1	1
Secretary/Administrative Assistant(BOT)	1	1
Security Certified Network Professional	1	1
Security Technologies	1	1
Security+	1	1
Servers, Networking & Administration	1	1
Service Desk Hardware Support	1	1
Service Desk Software Support	1	1
SharePoint Server Specialization	1	1
Simulation and Gaming	2	1
Simulation and Gaming: Game Art	1	1
Skills Certificate in Interdepartmental Microcomputer Systems	1	1
Skills Certificate in C/C++	1	1
Small Computer Support Specialist	1	1
Social Network Marketing Specialist	1	1
Soft Skills Basics	1	1
Software Development	1	1
Software Development in C++ & C#	1	1
Software Development in Database	1	1
Software Development in Java	1	1
Software Development in the UNIX/LINUX Environment	1	1
Software Development in VISUAL BASIC.NET	1	1
Software Quality Assurance	1	1
Software Specialist	2	1
Sound & Video Design Specialty	1	1
Sound Design	1	1
Sound Recording	1	1
Specialty in Java Programming	1	1

Specialty in Microsoft Access	1	1
Specialty in Microsoft Excel	1	1
Specialty in Oracle Database Administrator	1	1
Spreadsheet Applications	1	1
Spreadsheets	1	1
SQL Programming	1	1
Supervisory Management Certificate of Achievement	1	1
System Programming	1	1
System Support Services	1	1
Systems Administration	1	1
Systems Analyst	1	1
Systems Development	3	1
Systems Programming-Advanced	1	1
Systems Support Specialist	2	1
Technical Communications	1	1
Technical Illustration: Art Graphics	1	1
Technical Writing	1	1
Technology Management Skills	1	1
Telecom & Network Technician	1	1
Telecommunication Servicing Technology	1	1
Telecommunications Technician	1	1
Television Production	1	1
Typist / Word Processor	1	1
Unix	1	1
Unix Administrator	1	1
UNIX Networks	1	1
UNIX Operating System	1	1
UNIX Operating Systems	1	1
Unix Systems Administration (Level 1)	1	1
Unix Systems Administration (Level 2)	1	1
Unix/Linux Administration	1	1
UNIX/Linux Open Source Training	1	1
Unix/Linux Operating System	1	1
UNIX/LINUX System Administration	1	1
Video and Animation(MAT)	1	1
Video and Media Design(MAT)	1	1
Video Design & Production	1	1
Video Design Specialty	1	1
Video Game Animation	1	1
Video Game Artist	2	1
Video Game Developer	1	1
Video Game Development	3	1

Video Production & Editing	1	1
Video Production [Employment Concentration]	1	1
Virtual Assistant	2	1
Virtual Assistant Certificate	1	1
Virtual Assistant: Administrative Support Skills Certificate	1	1
Virtual Assistant: Bookkeeping Skills Certificate	1	1
Virtual Assistant: Promotional/Marketing Skills Certificate	1	1
Virtual Office Assistant	1	1
Virtual Office Professional - Administrative Concentration	1	1
Virtual Office Professional - Technical Support Concentration	1	1
Virtual Office Professional - Web Management Concentration	1	1
Virtualization System Administration	1	1
Visual and Performing Arts Graphic Design	1	1
Visual Basic	1	1
Visual Basic Programmer	1	1
Visual Basic Programming	4	1
Visual Basic Programming Skills Certificate	1	1
Visual C Programming Skills Certificate	1	1
Visual Communication	1	1
Visual Communication (MAT)	1	1
Visual Communications	1	1
Visual Development [Employment Concentration]	1	1
Web 2.0	1	1
Web and Multimedia Design	1	1
Web Authoring	1	1
Web Authoring Skills Certificate	1	1
Web Authorizing	1	1
Web Based Multimedia (Skills Cert)	1	1
Web Business Management	1	1
Web Client Development	1	1
Web Client Technologies	1	1
Web Construction	1	1
Web Content	1	1
Web Data Base Design	1	1
Web Database Technology	1	1
Web Delivery	1	1
Web Design	13	1
Web Design & Graphics	1	1
Web Design (Certif. of Completion)	1	1
Web Design [Employment Concentration]	1	1
Web Design Basics	1	1
Web Design Certificate	1	1

Web Design Skills	1	1
Web Design w/Dreamweaver Certificate	1	1
Web Design(MAT)	1	1
Web Designer	1	1
Web Developer	6	1
Web Developer with Emphasis in Windows	1	1
Web Developer with Java / Open Source	1	1
Web Developer-Level 2 (Certif. of Achievement)	1	1
Web Developer-Level 3	1	1
Web Development	8	1
Web Development (Skills Cert)	1	1
Web Development & Administration	1	1
Web Development and Design(MAT)	1	1
Web Development Technologies	1	1
Web Graphic Design	1	1
Web Graphic Production Certificate of Achievement	1	1
Web Graphics	1	1
Web Graphics and Design	1	1
Web Infrastructure	1	1
Web Interactive Design/Level 1	1	1
Web Interactive Design/Level 2	1	1
Web Interactive Design/Level 3	1	1
Web Marketing and Media Design	1	1
Web Master	5	1
Web Networking Technology	1	1
Web Page Authoring	2	1
Web Page Design	1	1
Web Page Designer	2	1
Web Page Developer Level 1	1	1
Web Page Developer Level 2	1	1
Web Page Development	2	1
Web Page Editor	1	1
Web Page Production Specialist	1	1
Web Production	1	1
Web Production (Fast Track)	1	1
Web Program	1	1
Web Programmer	1	1
Web Programming	5	1
Web Programming (Certif of Completion)	1	1
Web Programming (Certif. of Completion)	1	1
Web Programming (Fast Track)	1	1
Web Programming Concentration	1	1
Web Project Management Certificate of Achievement	1	1

Web Publishing	3	1
Web Publishing & Design	1	1
Web Publishing (Certif. of Completion)	1	1
Web Publishing/Dreamweaver	1	1
Web Scripting	1	1
Web Security	1	1
Web Server Administration	1	1
Web Server Administrator with Emphasis in Linux	1	1
Web Server Administrator with Emphasis in Windows	1	1
Web Server Development	1	1
Web Server Management	1	1
Web Site Devel. Techniques	1	1
Web Site Development: ASP Programmer Certificate of Achievement	1	1
Web Site Development: Java Programmer Certificate of Achievement	1	1
Web Site Development: JavaScript Programmer Certificate of Achievement	1	1
Web Site Development: PHP Programmer Certificate of Achievement	1	1
Web Site Development: Web Graphic Designer Certificate of Achievement	1	1
Web Site eCommerce Administrator	1	1
Web Site Production	1	1
Web Support and Administration	1	1
Web Support and Database Administration	1	1
Web-Based Multimedia (Skills Cert)	1	1
Webmaster	1	1
Webmaster Level 2	1	1
Webmaster Level I	1	1
Website Development	1	1
Website Construction & Maintenance	1	1
Website Creator	1	1
Website Designer	2	1
Website Development	2	1
Website Development Management	1	1
Website Software Specialist	2	1
Windows Administration Proficiency Award	1	1
Windows Engineering	1	1
Windows Network Administrator	1	1
Windows Networking	1	1
Windows Programming	1	1
Windows Server 2008 Specialization	1	1
Windows Vista Specialization	1	1
Wireless Communications Technology	1	1
Wireless LANs	1	1
Wireless Networking	1	1
Wireless Networking Certificate of Proficiency	1	1
Wiring and Installation	1	1
Word Processing	6	1
Word Processing Basics	1	1
Word Processing Technician	1	1

APPENDIX 5: CCC ICT RELATED COLLEGE, DEPARTMENT, DEGREE AND CERTIFICATE DATA AND LINKS

ICT RELATED ACADEMIC DEGREES AND CERTIFICATES FOR CALIFORNIA COMMUNITY COLLEGES							
	College	City	State	Department	Associate Degree/Option	Academic Certificate/Option	# of Units
1	Allan Hancock College	Santa Maria	Ca	Business	A.S. Computer Business Informations Systems		27
2	Allan Hancock College	Santa Maria	Ca	Business	A.S. Computer Business Office Technology Administrative Assistant/Secretarial	-	24
3	Allan Hancock College	Santa Maria	Ca	Business	A.S. Computer Business Office Technology Word/Information Processing	-	24
4	Allan Hancock College	Santa Maria	Ca	Business	-	Computer Business Information Systems	27
5	Allan Hancock College	Santa Maria	Ca	Business	-	Computer Business Information Systems-Information Architecture	6.5
6	Allan Hancock College	Santa Maria	Ca	Business	-	Computer Business Information Systems-Information Technology Fundamentals	9
7	Allan Hancock College	Santa Maria	Ca	Business	-	Computer Business Information Systems-Office Systems Analysis	13.5
8	Allan Hancock College	Santa Maria	Ca	Business	-	Computer Business Information Systems-Computer Business Office Software	5
9	Allan Hancock College	Santa Maria	Ca	Business	-	Computer Business Information Systems-Database Administration	17.5
10	Allan Hancock College	Santa Maria	Ca	Business	-	Computer Business Information Systems-Office Software Support	15
11	Allan Hancock College	Santa Maria	Ca	Business	-	Computer Business Information Systems-Small Business Webmaster	10
12	Allan Hancock College	Santa Maria	Ca	Business	-	Computer Business Office Technology Administrative Assistant/Secretarial	24
13	Allan Hancock College	Santa Maria	Ca	Business	-	Computer Business Office Technology-Administrative Office Skills	15
14	Allan Hancock College	Santa Maria	Ca	Business	-	Computer Business Office Technology-Computer Presentations and Publishing	4.5
15	Allan Hancock College	Santa Maria	Ca	Business	-	Computer Business Office Technology Word/Information Processing	24
16	Allan Hancock College	Santa Maria	Ca	Business	-	Computer Business Office Technology-Computer Office Business Skills	4

17	Allan Hancock College	Santa Maria	CA	Mathematical Sciences	A.A. Computer Science	-	24
