

# Recently Opened files

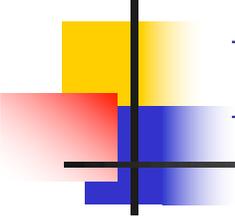

---

## ■ RecentDocs

- Entries indicating which files were most recently used
- HKEY\_CURRENT\_USER\Software\Microsoft\Windows\CurrentVersion\Explorer\RecentDocs
- It can be cleared through the Taskbar and Start Menu Properties dialog
  - Classic Start menu Customize...

## ■ Find mapped drives

- HKEY\_CURRENT\_USER\Network
- HKEY\_CURRENT\_USER\Software\Microsoft\Windows\CurrentVersion\Explorer\Map Network Drive MRU

# RecentDocs

---

- The recently accessed documents could be found at RecentDocs subkey at: *Software\Microsoft\Windows\CurrentVersion\Explorer\RecentDocs*.
- RecentDocs contains **subkeys for every file** type used on the system (e.g. a subkey for .csv, .doc, .mp3, etc.).
- Each of these subkeys will contain its own MRUListEx that records the order of the recent accessed files for each extension. For instance, if the MRUListEx value is " 3, 2, 1,0" it means the order of the most recent accessed files was – file 3, file 2, file 1 and file 0. The exact file names can be found by clicking 0, 1,2, and 3 entries in the list.
- Each entry in the MRUListEx is a little endian 4 byte value. That is, each entry is 32-bit integer with the least significant byte stored at the beginning of the entry. E.g. '3' would be shown as '03 00 00 00.'
