

Free World-Class Applied STEM Materials Available Right in Your Campus LMS

STEMLink puts thousands of high-quality authoritative applied STEM educational materials right into the Learning Management System on your campus. Developed primarily at two-year academic institutions as part of the National Science Foundation's Advanced Technological Education (ATE) initiative, these resources include modules, videos, demonstrations, lab exercises, assessments, full courses, and much more, all available for your use in your courses and classrooms at no cost to you or your institution.

What does STEMLink cost?

*STEMLink is **free**. There is no charge to you or your institution for connecting to STEMLink or using the STEMLink materials in your courses and classrooms.*

What kind of materials are available through STEMLink?

*STEM educational materials include courses, modules, videos, demonstrations, assessments, and more, covering a wide variety of applied STEM fields, including **nano** and **microtechnology**, **materials science**, **advanced manufacturing**, **geospatial technologies**, **cybersecurity**, and **precision agriculture**, as well as fundamental areas like **biology**, **chemistry**, **engineering**, and **mathematics**.*

Where do the STEMLink materials come from?

*The STEMLink curriculum and resources are developed by content experts at academic institutions across the country (often in collaboration with leading-edge industry partners) under funding from the NSF's **Advanced Technological Education** initiative.*

What LMS platforms work with STEMLink?

*STEMLink currently supports **Canvas**, **Blackboard**, and **Moodle**, with support for other LMS platforms being added based on demand.*
